Reference: Amended 2nd Draft AUGS

Date: 30th November 2011

Dear Colleague

As you are aware we were planning to publish an amended 2<sup>nd</sup> draft AUGS today taking account of matters raised during the recent consultation period. This was on track but we identified some theft data issues and clarifications that we wanted to address with Xoserve before publication as it could have an impact on our overall split of unidentified gas between SSP and LSP sectors. We are expecting this to be resolved this week and our intention is to publish the updated AUGS on Friday 2<sup>nd</sup> December.

Please accept our apologies for this short delay, but we believed it was appropriate to address these before publication.

You will all no doubt have seen our responses to the issues raised during the 2<sup>nd</sup> draft consultation period. If there are any responses that you do not understand and require clarification on we will accept such queries between now and the UNCC meeting on 15<sup>th</sup> December if this assists you in your decision in terms of accepting the methodology. Note that these should be limited to clarifications of the responses and should not be an opportunity to raise new issues.

Yours sincerely

Clive Whitehand  
Senior Consultant
