

**Ref 005**

**Energetics UK**

Energetics Gas supports the work AUGÉ is carrying out in relation to unidentified gas, however all iGTs submit weekly updates to Xoserve detailing the volume taken by each shipper at each CSEP.

It would seem that rather than receiving the information from each iGT and collating the data, Xoserve should be able to provide the collated data directly.

In the event that Xoserve are unable to provide this information, please contact me and I will endeavour to send the information across.
