Reference: Query responses

Date: 13th November 2013

Dear Gareth

Further to the queries you raised on 27th September we have concluded our analysis of the impact of Mod410A. Although we have limited information with which to estimate the exact impact of Mod410A we have identified a method to incorporate it into the AUG Table for 2014/15.

The analysis and proposed changes to the AUGS will be published separately for consideration at the next UNCC on November 21st.

We have classified this issue under 8.5, a material change that requires a change to the AUGS that can be implemented before publication of the final AUG Table.

Yours sincerely

Clive Whitehand
