

## Stage 01: Modification

# 0473:

## Project Nexus – Allocation of Unidentified Gas

At what stage is this document in the process?

This Modification Proposal is one of a series seeking to implement the requirements identified under Project Nexus. This modification identifies changes to the UNC to enable determination in the proposed energy allocation process to enable an appropriate distribution of Unidentified Gas.

The Proposer recommends that this modification should be (delete as appropriate):

- assessed by a workgroup

High Impact:  
Shipper cost allocation

About this document:		
This modification will be presented by the proposer to the panel on 19 December 2013.		
The panel will consider the proposer's recommendation, and agree whether this modification should be subject to self-governance; and whether it should be issued for consultation or be referred to a workgroup for assessment.		<b>Any questions?</b> Contact: <b>Code Administrator</b>  <a href="mailto:enquiries@gasgovernance.co.uk">enquiries@gasgovernance.co.uk</a>  0121 288 2107 Proposer: <b>Steve Mulinganie</b>  email address <a href="mailto:stevemulinganie@gazprom-energy.com">stevemulinganie@gazprom-energy.com</a>  telephone <b>07590 245256</b> Licence Holder: <b>Gazprom Energy (GE)</b>  email address.  telephone Systems Provider: <b>Xoserve</b>  <a href="mailto:commercial.enquiries@xoserve.com">commercial.enquiries@xoserve.com</a>

# 1 Summary

## Is this a Self-Governance Modification?

Self Governance procedures are not proposed. This is on the basis that the modification, if implemented would have a material effect on relevant commercial activities as set out in the Uniform Network Code (UNC), these being connected with shipping arrangements and the transportation of gas.

## Why Change?

Development of UNC Modification Proposal 0432 'Project Nexus – Gas Demand Estimation, Allocation, Settlement and Reconciliation reform'<sup>1</sup> is nearing completion. The Business Requirements Documents (BRDs) which constitute the business rules currently provide that no manual intervention in the distribution of Unidentified Gas<sup>2</sup> between relevant market sectors would occur as might be a consequence of the determination of an Allocation of Unidentified Gas Expert (AUGE)<sup>3</sup>. Notwithstanding this, Modification 0432 and associated legal text identifies a mechanism whereby, should such determination be deemed necessary, this could be readily incorporated within the proposed regime.

A number of User members of the Modification 0432 Workgroup have identified a concern that the proposed 'Allocation Scaling Adjustment' methodology could be considered simplistic and insufficient to ensure accurate apportionment of Unidentified Gas when compared with the current AUGE arrangements and would therefore have to be considered a retrograde step. Some Users believe that it may be beneficial to leverage the experience of the AUGE such that a methodology is developed to enable periodic intervention in allocation using the services of an AUGE to determine the proportions of Unidentified Gas to be applied to each market sector.

## Solution

The purpose of this Modification Proposal is to facilitate appropriate arrangements to permit the determination by an AUGE of the extent to which Unidentified Gas is shared between relevant market sectors. The proposed arrangements would be incorporated within the allocation and settlement framework identified within Modification Proposal 0432.

## Relevant Objectives

Implementation of the changes identified within this modification could be expected to facilitate the securing of effective competition between Users. The changes are expected to lead to more accurate allocation of Unidentified Gas costs between Users.

## Implementation

1st October 2015 if an Authority decision is made by 31st March 2014

1st April 2016 if an Authority decision is made by 30th September 2014

With a backstop lead time of 18 months (549 calendar days) should the Authority makes its decision after 30th September 2014.

<sup>2</sup> TPD Section E10.1.1(a): <http://www.gasgovernance.co.uk/TPD>

<sup>3</sup> TPD Section E10.1.1(f): <http://www.gasgovernance.co.uk/TPD>

## 2 Why Change?

The proposed energy allocation framework identified within Modification Proposal 0432 presently does not identify a methodology for the redistribution of Unidentified Gas between the Smaller Supply Point (SSP) and Larger Supply Point (LSP) market sectors over and above the simplistic approach which would occur as part of the proposed 'Allocation Scaling Adjustment mechanism'. A number of User members of the Modification 0432 Workgroup have identified a requirement for such determination and believe such an approach is consistent with current AUGÉ regime.

For the purposes of avoiding unnecessary delay to the development of Modification 0432, it has been decided to permit that Proposal to conclude its development on the basis of the existing business rules (i.e. no methodology for determination in allocation) albeit the Proposal (and proposed legal text) will reflect a mechanism by which the allocation of energy can be shared should the industry determine that this be necessary. The benefits of this approach is that the Transporter's agent (Xoserve) can proceed to develop relevant supporting systems and processes with certainty and with sufficient flexibility to accommodate determination in Unidentified Gas allocation should this ultimately be required.

## 3 Solution

The purpose of this Modification Proposal is to develop an Unidentified Gas determination and sharing methodology utilising the services of an AUGÉ.

Modification of the UNC is required to incorporate appropriate arrangements to permit the sharing of Unidentified Gas between market sectors by an AUGÉ post Nexus implementation. Rather than as an 'after the event' adjustment process as is presently the case, this would occur as part of the process of deriving and applying the 'Allocation Scaling Adjustment' developed within the remit of Modification Proposal 0432.

As part of the development of this Modification Proposal it will be necessary to review the need for or if necessary amend the existing 'Guidelines for the appointment of an Allocation of Unidentified Gas Expert'<sup>4</sup>.

### User Pays

#### Classification of the modification as User Pays, or not, and the justification for such classification.

It is anticipated that the existing AUGÉ related User Pays service will continue with no ACS amendment necessary. As the existing User Pays service is unchanged, this is not a User Pays modification.

#### Identification of Users of the service, the proposed split of the recovery between Gas Transporters and Users for User Pays costs and the justification for such view.

#### Proposed charge(s) for application of User Pays charges to Shippers.

<sup>4</sup> [AUGÉ guidelines document: http://www.gasgovernance.co.uk/tpddocs](http://www.gasgovernance.co.uk/tpddocs)

Proposed charge for inclusion in the Agency Charging Statement (ACS) – to be completed upon receipt of a cost estimate from Xoserve.

## 4 Relevant Objectives

Impact of the modification on the Relevant Objectives:	
Relevant Objective	Identified impact
a) Efficient and economic operation of the pipe-line system.	None
b) Coordinated, efficient and economic operation of (i) the combined pipe-line system, and/ or (ii) the pipe-line system of one or more other relevant gas transporters.	None
c) Efficient discharge of the licensee's obligations.	None
d) Securing of effective competition: (i) between relevant shippers; (ii) between relevant suppliers; and/or (iii) between DN operators (who have entered into transportation arrangements with other relevant gas transporters) and relevant shippers.	Positive
e) Provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers.	None
f) Promotion of efficiency in the implementation and administration of the Code.	None
g) Compliance with the Regulation and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.	None

Implementation of the changes identified within this modification would be expected to facilitate the securing of effective competition between Users. The changes are expected to lead to more accurate allocation of Unidentified Gas costs between Users.

## 5 Implementation

1st October 2015 if an Authority decision is made by 31st March 2014

1st April 2016 if an Authority decision is made by 30th September 2014

With a backstop lead time of 18 months (549 calendar days) should the Authority makes its decision after 30th September 2014.

These dates and the lead time proposed have all been selected to be consistent with Modification 0432 such that this modification is implemented coincident with other Nexus related changes..

## 6 Legal Text

Legal text will be provided upon completion of development of this Modification Proposal.

## 7 Recommendation

The Proposer invites the Panel to:

- Determine that this modification should not be subject to self-governance;
- Determine that this modification should progress to Workgroup assessment.
