

Notice of Revised LDZ Gas Transportation Charges to Apply from 1st April 2010 for East of England, London, North West and West Midlands Distribution Networks

This notice confirms the LDZ gas transportation charges which will apply from 1st April 2010 for East of England, London, North West and West Midlands Distribution Networks. Notice is provided two months ahead of the implementation date, consistent with our Licence and Network Code obligations.

The average changes to distribution transportation charge levels from 1 April 2010 are shown in Table 1.

Table 1. Average Transportation Price Change from 1st April 2010

	East of England	London	North West	West Midlands
Average Change	4.4%	8.4%	6.3%	9.1%

The CSEP Administration Charge is increased for all networks by 4.1% to 0.1233p per day. Other administration charges and the Optional LDZ Charge are unchanged.

The revised charges have been set so as to bring charges into line with the forecast price control allowed revenue for the period April 2010 to March 2011. The revised charges also incorporate the change to the methodology whereby the LDZ System and Customer charge levels are set to target a network-specific split of revenue as set out in the DNPC05 consultation report. This change results in the levels of the LDZ System and Customer charges varying by more or less than the average shown above for each network so that the effective change in transportation charge levels will vary by load size, but with an average change across all loads within a network as shown above.

The definitive LDZ transportation charges to apply from 1st April 2010 for each network are shown in the attached tables. This document will also be available on the National Grid web site at <http://www.nationalgrid.com/uk/Gas/Charges/NoticeofChange/>

If you have any questions about this notice, please contact me or Stephen Marland, Pricing Manager, tel: 01926 656912, email: stephen.a.marland@uk.ngrid.com
