

## Modification Process for “routine mods”

---

- NG is aware that some recent mods have taken a lengthy time to progress e.g. Mod 600S (Amend obligation for the acceptance of EPDQD revisions made after D+5) and Mod 605S (Amendments to TPD Section K - Additional Methods to Procure and Dispose of Operating Margins Gas)
- NG is reviewing internal processes and timelines for how we progress “routine mods” to help identify any changes which may increase efficiency of our approach to progressing future “routine mods”
  - We plan to trial this by utilising identified improvements via a trial “routine mod” (mod to be determined) in the next few months.
  - Following this we plan to assess the effectiveness of the trial mod with industry (potential workshop/survey) and also to explore further ideas/thoughts on future improvements to the “routine mod timeline”
  - If anyone has any initial ideas/suggestions for how we can improve please inform Lesley Ramsey - [Lesley.Ramsey@nationalgrid.com](mailto:Lesley.Ramsey@nationalgrid.com)
