

## **Legal text Commentary for UNC Modifications 0633 / 0638:**

TPD M 5.9 expands the criteria for sites which are assigned to Class 4 and are to be monthly read:

- Where the AQ is not less than 293,000 kWh or
- Where the Shipper has so elected or
- Where is it a Smart or Advanced Supply Meter (added in TPD M5.9.1 (b) (iii))

If the site does not meet any of the above criteria, then it qualifies as an annual read meter.

TPD M5.9.1 (d) defines Advanced consistently with TPD M2.1.14 where it is defined for the purposes of that paragraph.

TPD M5.9.2 expands to include Smart and Advanced meters.
