Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

Implementation of this modification will improve the data quality within the gas settlements system, as there appears to be an under-recording of Smart Meters and AMR devices at sites. This improvement in data quality will aid the AUGS in its undertaking of the assessment of the sources of Unidentified Gas, and will help shipper processes as shippers will know the meter type installed at sites. Furthermore, it will help in the reporting of compliance with the CMA Gas Settlement Order, which requires every site with a Smart Meter or AMR device to submit reads at least monthly from 1st April 2018.
