Reviewing the Gas Demand Side Response (DSR) Arrangements

Transmission Workgroup
4th October 2018

nationalgrid

DSR Review

- National Grid has a Licence obligation to review the Gas DSR arrangements annually with the industry
- The next review must be completed by April 2019, meaning we need to start the formal consultation by February 2019
- We consider that the events of 1st March 2018 and changes in the electricity market are relevant in this context
- We are keen to hear views from customers and stakeholders about the current DSR arrangements during Q4 2018 in order to inform our consultation questions that will be published in Q1 2019
- If any customer or stakeholder wishes to have a meeting / call with National Grid about this topic, please contact philip.hobbins@nationalgrid.com (01926 653432)
