Your Reference: UNC Modification Proposal 0672

UNC Modification Proposal 0672 - Target, Measure & Report Product Class 4 Read Performanc

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which Cadent would like to support.

Do you support or oppose implementation?

Support

Relevant Objective:

d) Positive

Reason for support/opposition:

This modification will complement the existing Meter Reading arrangements within the UNC by ensuring that, as well as a minimum percentage of overall numbers of Supply Points have Meter Readings submitted, that the overall AQ within a Shippers Class 4 portfolio should be targeted in a similar manner which should help alleviate UIG.

As part of the modification, additional reporting will also be produced which will give PAC visibility of performance.

Implementation

We believe this modification meets the Self Governance criteria as it simply complements existing arrangements within the UNC and therefore implementation could take place 16 days after Modification Panel decision subject to no appeal being raised.

Impacts and Costs

None identified.

Legal Text

As provider of the legal text we are satisfied that it meets the intent of the modification.

Are there any errors or omissions in this Modification Report that you think should be taken into account?

We have not identified any errors or omissions.

Please provide below any additional analysis or information to support your representation

Nothing further to add.

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 07884 113385 (andy.clasper@cadentgas.com) should you require any further information.

Yours sincerely,

Andy Clasper
