UNC Modification Proposal 0692S - Automatic updates to Meter Read Frequency

Dear Bob,

Thank you for your invitation seeking representations with respect to the above Modification Proposal which Cadent would like to support.

**Do you support or oppose implementation?**

Support

**Relevant Objective:**

d) Positive

**Reason for support/opposition:**

The modification, if implemented would give the CDSP the authority to amend the Meter Read Frequency for Supply Points with Smart or AMR equipment or where the Annual Quantity is equal to or greater than 293,000kWh to **Monthly**. This is necessary due to a large number of Supply Points continuing to have an incorrect Read Frequency.

This change could therefore allow for more Meter Readings being submitted which may assist in a reduction of UIG.

**Implementation**

Implementation of the modification is required to align with the associated DSC Change Proposals XRN4941 and XRN5036. This is to ensure that there is no change to the numbers of 'must reads' which Transporters carry out on behalf of Shippers.

## **Impacts and Costs**

We do not yet have visibility of the costs of XRN5036 which will require Xoserve system changes and for which Transporters are liable for. We would though expect to recover these costs by amending our 'must read' charges.

## **Legal Text**

As Legal Text provider we are satisfied that it meets the intent of the Modification.

## **Are there any errors or omissions in this Modification Report that you think should be taken into account?**

We have not identified any errors or omissions.

## **Please provide below any additional analysis or information to support your representation**

Nothing further to add.

We trust that this information will assist in the compilation of the Final Modification Report. Please contact me on 07884 113385 ([andy.clasper@cadentgas.com](mailto:andy.clasper@cadentgas.com)) should you require any further information.

Yours sincerely,

Andy Clasper
