

UNC (Uniform Network Code)
Panel Chair and the Joint Office
of Gas Transporters

Email: industrycodes@ofgem.gov.uk

Date: 27 October 2021

Dear Wanda and colleagues,

UNC modification proposal UNC788: 'Minimising the market impacts of 'Supplier Undertaking' operation' – amended timetable

On 19 October we decided to grant urgency status to UNC788¹, and directed a timetable that required the Modification Panel to send to Ofgem a recommendation on whether the modification would be accepted or rejected by 22 October 2021.

We recognise that the original timetable for the Modification Panel recommendation has not been followed due to unforeseen circumstances, and that a further Modification Panel meeting has been arranged on 28 October 2021.

I am writing to confirm that we agree that the Joint Office should reconvene the Modification Panel on 28 October 2021 in order to resume the urgent progression of UNC788 and ask that the Joint Office adheres to the timescales envisaged in the original urgency decision from the re-arranged Modification Panel meeting (28 October 2021).

Yours sincerely,

Eleanor Warburton
Deputy Director - ESO and Gas Systems
