XRN 5554 - Allocation of Unidentified Gas Expert (AUGE) Management – Independent Review

Date: 06 October 2022

Organisation: Centrica

Abstract:

I stand by the decision taken at DSC Change Management Committee and the change should not be implemented.

Contrary to the appeal, the proposed change does not increase efficiency. The independent process to review an independent expert does not provide an effective service or add efficiency.

The appropriate process has been followed. A vote was taken after the consultation period where the information had been presented and digested. The constituencies have cast their vote, a decision has been made by the representatives and the change was rejected.

This vote should stand.

Thanks,

Oorlagh
