Dear Bob

Re: Modification 0344 Removal of the D+1 11am meter read liabilities regime for DM Voluntary (DMV) Supply Points

Please find attached Gazproms response to Modification 0344. We are happy for our comments to be shared with other interested parties.

We believe it is appropriate to exclude Daily Metered voluntary (DMV) Supply Points from the definition of Performance Relevant Supply Meters for the purposes of the day after the day 11am read provision to Users (UNC TPD Section M 5.2.2).

Gazprom **supports** Modification Proposal 0344 Removal of the D+1 11am meter read liabilities regime for DM Voluntary (DMV) Supply Points **however** we believe the implementation should be aligned with the full roll out of the Daily Metered Elective (DME) service. Any implementation should be aligned with the ability to contract for a suitable commercial product with appropriate liabilities.

I trust these comments are helpful. If you have any queries regarding this response please do not hesitate to contact me directly.

Yours Sincerely

Steve Mulinganie
