Dear Bob

**Response to UNC Modification Proposal 0296
Facilitating a Supply Point Enquiry Service for Non-Domestic
Supply Points**

Information is currently available to shippers via the Supply Point Enquiry Service and has been since the introduction of Transco's Network Code in 1996.

The information includes a single figure for annual consumption which is of some use in determining likely third party transportation charges but is of limited value in constructing sales proposals for customers. The data is historic in nature and it is only the customer that can provide an accurate picture of their contract requirements going forward which may change substantially year on year.

However the proposal does introduce a more efficient means of accessing information that is already available and so will in our view (even if only to a limited degree) support the promotion of competition in accordance with Standard Special Condition A11 (1) (d).

Therefore E.ON UK is in support of Proposal 0296.

Yours sincerely

Brian Durber
