Reference: AUGS Data 2012

Date: 4th January 2013

Dear Colleague

We have prepared exports of the data used for the calculation of total Unidentified Gas and analysis of theft split carried out in 2012. These are in the form of a series of Oracle database exports for theft, common data associated with the consumption methodology and separate exports of meter reads and volumes for each LDZ.

The data cannot be uploaded to UK-Link so we will distribute via DVD to those parties that request it.

If you wish to request the data, please contact Xoserve in the first instance, who will validate that the request has come from a UNC signatory party. Please send an email to the box account: as.billing.commercial@xoserve.com, and provide your registered company name, 3-letter UNC Shipper Shortcode and the name and address to which the data DVDs should be posted, plus your contact details in the event of any queries. Xoserve will forward all validated requests to us for action.

Please note that this data is provided only for the purposes of your review of the Draft AUGS and must not be used for any other purpose. Nor should it be disclosed to any other party without our express permission.

The data sets contain dummy MPRs for anonymity and there are no references to Shippers within the data. Note that the dummy MPRs for the meter reads/metered volume data are not the same as the MPRs for the theft data.

We will then send 2 DVDs containing the data used for the analysis. Note that there are additional summary spreadsheets that bring the consumption results together and include adjustments for metering errors. These will be posted separately on UK-link. In addition, examples of the split of Unidentified Gas for Shipperless and Unregistered sites are already on UK-link link under item 22. Mod 229 AUGE data provision from last years methodology. These will be updated with more recent data once the overall methodology has been approved and the LSP/SSP split published.

If you have any queries regarding this process please contact the AUGE via the AUGE mailbox, AUGE@gl-group.com.

Yours sincerely

Clive Whitehand
