1 March 2013

Dear Mr Whitehand,

SSE's Response to the Unidentified Allocation of Gas Statement 2013/14

Energy UK is providing a response to the consultation on the Unidentified Allocation of Gas Statement 2013/14 on behalf of its members. As a member, SSE fully supports the view provided in this response and there are no further points that we wish to make at this time, other than we would like to reiterate the view that the consumption based methodology of calculating unidentified gas should be developed and implemented as soon as practicable.

Yours sincerely,

Mark Jones
Gas Data Quality Manager
