#### Do you support or oppose implementation?

Support

#### Please summarise (in one paragraph) the key reason(s) for your support/opposition.

RWE npower would be supportive of the proposal to remove all references in the UNC to the Bottom Stop Supply Point Capacity. We feel that this modification would be beneficial for customers, providing an enduring solution that will allow for DM consumers to reset their capacity bookings on an annual basis. We believe that where a customer has reduced consumption but could not reduce capacity below the BSSOQ, we would consider this to be unfair and welcome a permanent solution that provides a mechanism that enables it to be set it lower, otherwise, the customer would ultimately be penalised.

#### Are there any new or additional issues that you believe should be recorded in the Modification Report?
