

## Provision of Legal Text - Report Received by Email

### 0487S - Introduction of Advanced Meter Indicator and Advanced Meter Reader (AMR) Service Provider Identifier

**Date:** 13 August 2014

**Organisation:**

Northern Gas Networks

**Abstract:**

Please see the below statement in relation to the request for legal text for UNC Modification 0487S.

*The UNC Modification 0487S solution does not clearly set out new UNC obligations on parties. Changes to the technical requirements for RGMA files are a matter for SPAA governance rather than UNC. It is not clear from the proposal which UNC activity would trigger an obligation on shippers to provide the information requested, furthermore population of a backlog would require retrospective measures to be applied. Until such time as clear code obligations are set out it is not possible to produce legal text.*

Regards,

Joanna
