Dear Colleague,

Enduring Annual Applications Post Allocation Information Notification

In accordance with the UNC Section B and the ExCR, allocations of Enduring Annual NTS Exit (Flat) Capacity (EAFLEC) increase and decrease capacity applications are now complete and are available to view within the Gemini Exit system. These can be found in the following location:

Home > Deal > Capture > Request Information > Application Request Information Report

Allocated application requests will have a status of "ALL" however, if a reduction application remains with the status of "NEW", this will be allocated (subject to User Commitment) but is being considered as a donor location for substitution. Therefore we are unable to allocate this on the Gemini Exit system until we receive confirmation from OFGEM as to whether substitution is appropriate. Entitlements within Gemini will not show this allocation until the system is updated. Invoices however, will be at the new reduced capacity level.

Application increase requests with a status of "NEW" will not be allocated until a decision has been made by OFGEM regarding substitution.

Application requests with a status of "REJ" have not been allocated as per the reason specified in the Gemini Exit Reform System.

If you have any queries please contact a member of the capacity auctions team on +44 (0)1926 65 4057 or e-mail capacityauctions@nationalgrid.com

Yours Sincerely,

Bradley Charles
