

Gas Transportation Charges from 1 April 2016 for East of England, London, North West and West Midlands Distribution Networks (Supplemental for Additional DN Entry Sites)

This notice is intended to supplement our previously published [Final Charge Notification](#) for the charging year commencing 1st April 2016, and to revise our previous [Supplemental Price Notification](#) issued on 17th March 2016.

The purpose of the notice is to revise the DN Entry Commodity credit rate for the Stoke Bardolph site in our East of England network. The level of DN Entry Commodity rate is partly determined by the pressure tier at which the site connects to the Distribution Network. The rate published originally had assumed that the site connects at the intermediate pressure tier. This has been amended to the medium pressure tier via this revision.

The revised rate will be applicable for the period between commencement of site operation and the end of the charging year on 31st March 2017.

If you have any questions or comments regarding this notice please contact me at the address below.
