

## Shipperless and Unregistered Sites Glossary of Terms

### Definition of Unregistered Site

A site that currently does not have a registered supplier and has never had a registered supplier. The meter point status of the corresponding MPRN is **not** DE or EX. Only sites that are over 40 Business Days old are classified as unregistered.

Term / Abbreviation	Description	Size of Population (As at 07/06/07)
GSR Shipperless Sites	Following a Gas Safety Regulations visit by the network an engineer has identified that a meter is on site and flowing gas. UK Link shows that the meter has been removed and the shipper has completed a voluntary withdrawal.	779
Shipper Activity Unregistered Sites	An unregistered site where xoserve have identified shipper activity. For example where an MPRN has been created on behalf of a shipper via the Fast Track, Code 12 or MNC process. Rejected ONJOB and ONUPD updates are also classified as shipper activity. As part of the USNANA project the scope of shipper activity has been widened to include Confirmation Rejections, Meter Read Rejections, UK Link File Rejections, and New supply quotations requested by shippers.	8,674
USNANA	Unregistered Sites No Activity No Asset. A site is classified as USNANA when it does not have a registered supplier and has never had a registered supplier. The meter point status of the corresponding MPRN is <b>not</b> DE or EX , the site is over 40 business days old and xoserve have been unable to identify any meter activity or shipper activity.	111,788
MOD 675 Shipperless Site	Networks visit sites with a Clamped or Capped meter status on UK Link a where 12 months has elapsed since the previous shippers voluntary withdrawal date. Where a meter is found to be in use xoserve will send the supply point details to the previous shipper.	104
