

**Representation For. 0054**  
"Emergency Curtailment Quantity (ECQ) Methodology Statement"  
Version 1.0

**Date of Communication:** 05/01/2006  
**External Contact:** Beverley Grubb(Scotia Gas Networks)  
**Slant:** For  
**Strictly Confidential:** No  
**Abstract**

Thank you for providing SGN with the opportunity to comment on the above Modification Proposal.

SGN fully supports Modification Proposal 0054 which is aimed at improving transparency and providing a more inclusive and robust governance process by:

- formally recognising the ECQ Methodology Statement as a UNC ancillary document
- providing that changes be made following approval by Panel Majority of the UNC Committee
- ensuring that current versions of the document are published via the Joint Office.

SGN believes that such arrangements would better facilitate the relevant objectives by promoting efficiency in implementation and administration of the UNC and associated arrangements.

I hope these comments are helpful.

Regards

Beverley Grubb
