Dear Mike,

**Application for Consent to Modify Transco's Network Code in relation to Modification 608  
'Amendments to LNG Services from 2003/04'**

I refer to Transco's application to the Gas and Electricity Markets Authority for consent to modify Transco's Network Code to address a text error within Section Z introduced by the implementation of modification proposal 608 – 'Amendments to LNG Services from 2003/04'.

The text error is the result of timing issues with the implementation of modification proposals 608 and 654 'Notification of LNG Storage Duration' which came into effect on 1 April 2004 and 22 December 2003 respectively. As both modifications amended Section Z, paragraph 2.3.2 the later implementation date for modification 608 resulted in the legal text implemented for modification 654 being superseded. The modification seeks to reinstate legal text as contained in the Final Modification Report and Notice of Implementation for Modification 654.

Ofgem has considered Transco's request in accordance with amended standard condition 9 (7)(b) of Transco's Gas Transporter licence and consents to the modification of the Network Code as set out in the 'Application for Consent to Modify the Network Code' - Reference CO91.

If you require any further information on this matter, please do not hesitate to contact me on 020 7901 7474.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Leigh Henderson".

Leigh Henderson,  
Network Code Analyst
