Npower	David Mayne	26/05/06	Accept	Yes	I have no problem with this change being put forward as a Class 1	<p>The change will be discussed at the June 06 UKLink Committee, regarding the scheduling of this change.</p> <p>It is proposed to seek views from the Committee for a November 06 Release as a Class 2 Modification that involves Operational changes only.</p>
Centrica	Graham Wood	24/05/06			<p>Whilst we support this in principle, we would like to understand further the detail regarding how the change would be implemented, so we can understand how this may impact our own systems.</p> <p>We therefore cannot at this time support the change as a Class 1 modification.</p> <p>Any further information you can provide would be very much appreciated.</p>	
Scottish & Southern	Cher Harris	26/05/06	Accept	Yes	Current workaround must not be removed less than 6 months from time of formal approval by UKLink Committee.
