Communication Ref	1559.2 - RH – SN
Title	COR1154.15.31: Shipper Rejection Codes v2.6 FA
Date	20/04/16

Dear colleague,

From conclusion of UAT testing there are a number of changes being proposed to the Shipper Rejection codes. Please see version 2.6 for approval attached. The details behind the changes are listed below and highlighted in purple within the document.

Changes for Approval

1. The inclusion of 3 new enduring File level Rejection Codes for the fault process
    SFN00001 - Fault already exists for MPRN
    SFN00002 - No Live fault found for the site
    SFN00003 - Fault Effective date is greater than system date

2. Additional outbound file SFR mapped to the rejection code DNI00514.

3. Removal of rejection code AQI00017 as there is no functionality to cancel a winter consumption correction, making this rejection code redundant.

4. Removal of rejection code AQI00022. Rejection code MRE00419 will apply in this scenario.

5. Additional Inbound File AQI mapped to rejection code MRE00419.

6. Removal of rejection code MRE00414 due to existing rejection code CNF00011 having a higher validation level which will mean that MRE00414 will never be triggered and therefore redundant.

7. Removal of rejection code MRE01033. This code was created in the initial design phase but through testing it has been identified no requirement exists for this rejection code to be issued.

8. Amendment of rejection code MPR 00011 'User is not the registered Shipper nor has a confirmation at CO status' strikethrough of 'nor has a confirmation at CO status' due to associated change with the treatment of the K08

Shipper Rejection
Codes V2.6FA.xlsx

This product, Shipper Rejection Codes V2.6 FA, will be published within the 'for approval' section within the SharePoint folder 30 containing all Nexus products.

Users' representations are invited by 3rd May 2016. These rejection codes will be discussed at the UK Link Committee on 12th May 2016 where approval will be sought.

If you have any questions related to this communication please contact uklink@xoserve.com

Kind Regards
Steve
