

# UNC 0708:

Mod Title: Re-ordering of the UNC in advance of  
Faster Switching

Proposer: Tracey Saunders, Northern Gas Networks

Panel Date: 21<sup>st</sup> November 2019

# Why change?

Please use bullets to summarise what in the UNC is wrong and creating problems

Faster Switching 'prepared version of' Legal text has

- New/amended/removed obligations (*not part of this proposal*)
- A re-ordering of the original UNC legal text

Re-ordering benefits:

- Identify where there are going to be changes in obligations as part of Faster Switching.
- Maintaining the 'prepared version' and current version in unison
- Allow companies to update any references in readiness (eg compliance schedules)
- Identify where new modification proposals impact the SCR

# Options

*Please use bullets to summarise what options have been considered to fix the identified problem. Is a UNC modification the only route?*

- Leave text as is and allow all changes to be implemented when the Faster Switching comes into effect
- Change the current UNC to match the re-ordered version (*pre CSS amendments*)

# Solution

*Please use bullets to briefly outline the solution contained within the modification.*

- The following proposed structural changes should be made:
  - Re-order UNC TPD Section G to put the current rules into a much more logical sequence; and
  - UNC TPD Sections G1.19, G5 and G6 to be moved to (respectively) UNC TPD Sections J1.9, TPD Section B, Annex B-3 and TPD Section B8.
  - UNC references to be checked and renumbered if required.

# Recommended Steps

- The Proposer recommends that this modification should be:
  - Subject to self-governance
  - Sent to workgroup assessment to develop the modification for 3 months
