

# UNC 0711

Update of AUG Table to reflect new EUC bands

**Proposer:** Steve Mulinganie (Gazprom Energy)

**Panel Date:** 21 November 2019

# Why change?

- When the AUG Table was last revised as part of Project Nexus, there were 9 End User Categories and 4 Product Classes, which the table reflected. This allows the AUG to align the Adjustment Factors it calculates with each End User Category.
- Since then, EUC Bands 1 & 2 have each been split into four new categories by Change Proposal XRN4665  
Creation of New End User Categories:
  - Non-Prepayment/Domestic
  - Prepayment/Domestic
  - Non-Prepayment I&C
  - Prepayment I&C
- As a result, the AUG Table no longer fully aligns with the End User Categories in effect for demand estimation.

# Options

- AUG Table is currently set out in the UNC and so to align demand estimation and UIG allocation processes it is necessary to update the UNC.

# Solution

- Update the AUG Table contained in UNC TPD Section E Annex E-1 by splitting EUC Band 1 & EUC Band 2 into four categories:
  - Non-Prepayment/Domestic
  - Prepayment/Domestic
  - Non-Prepayment I&C
  - Prepayment I&C

# Recommended Steps

- The Proposer recommends that this modification should be:
  - Subject to self-governance
  - Workgroup assessment to develop the modification for 1 month
