#### Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We agree with the proposer's view that many sites' are not being reconciled owing to difficulties in obtaining meter readings as a result of the COVID-19 pandemic. A process is therefore needed to allow shippers to submit reasonable estimates to allow reconciliations to occur and so improve cost allocation.

The solution provided allows that to be done quickly and effectively by utilising existing processes. We accept the need of keep records of shipper calculations to ensure future scrutiny.

#### Implementation: *What lead-time do you wish to see prior to implementation and why?*

Owing to the continuing problem of large numbers of sites being unreconciled this change needs to be implemented as soon as possible.

#### Impacts and Costs: *What analysis, development and ongoing costs would you face?*

Shippers will need to develop processes to calculate appropriate estimated meter readings and keep records if they wish to utilise this process.

#### Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

We have reviewed the legal text and have not indicated any concerns with the drafting.

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*
