Leeds	0113 301 0015
London	020 7950 1251
Manchester	0161 601 3094

**Participant Access Code – 76451578#**

### Agenda

1. **Introductions**
2. **Background and Purpose of meeting**
3. **AUGE response to questions submitted**

#### 3.1. **General Increase in Unidentified Gas**

We have seen a substantial increase in the level of Unidentified Gas. Whilst there is some information available on this and the methodology is clear, more detail on why the changes in calculation success rate and use of new data sets have such a big impact would be useful.

#### 3.2. **Daily Read Sites**

A small amount of gas (well below the current mandatory daily read limit) is being allocated to the DM regime. It is difficult to understand the process for doing this as the minimum consumption of a mandatory DM regime is around 60GWh p.a. Understanding how this number was arrived at for this sector is a key question.

4. **Any Other Business**
5. **Summary and Next Steps**
