Communication Ref : CB/1003/NJ
Subject : Code Contingency Guidelines Document - Revised Proforma

Colleague,

The Code Contingency Guidelines Document and associated forms Document have been updated by National Grid in order to update the GCDD-1 Contact Details Proforma.

The Proforma has been updated so that more accurate contact details can be provided to and collated from Shippers, which would enable a Gemini Contingency to be managed more effectively.

A shortened 5 day representation period is provided for this to be approved at the UKLink Committee on the 12th August. It is proposed that this change is a Class 1 UKLink Modification, as this is believed to be a documentation only change to the UKLink Manual Contingency Procedures. We are specifically requesting for the 10 day representation period described in Section U of the UNC to be waived for this modification, as we would like to test the expected benefits of this revised proforma as part of the Code Contingency Guidelines test, Exercise Star. Exercise Star is taking place on the 8th September. If required, a further representation period can be given after the meeting on the 12th August.

Users representations are invited back to the UKLink Manual box at uklink@xoserve.com by Friday 6th August, 2010. Users comments are requested specifically upon the classification of the change, and the reduction of the representation period.
