Communication Ref : CB/990/LP  
Subject : DM Elective External Shipper Testing

Colleague,

As part of UNC MOD O224 – Facilitating the use of AMR in the Daily Metered Elective Regime, there is a scheduled DM Elective (DME) External Shipper Testing phase which will enable Shippers to test elements of the DM Elective process. This testing phase is currently scheduled for the 4<sup>th</sup> October to 5<sup>th</sup> November 2010

If you are deciding to take on DM Elective sites post 21<sup>st</sup> November 2010; this would be a perfect opportunity to test elements of the DM Elective process prior to the implementation on 21<sup>st</sup> November 2010.

1. Shipper User Acceptance Testing (UAT) activities will consist of Shipper users:
  - a. Preparing UAT test cases
  - b. Performing the tests
  - c. Managing the results
  - d. Escalating faults to xoserve
  - e. Approving / Rejecting test results.

What xoserve requires....

1. Your interest in this activity
2. What elements would you like to test, *for example*:
  - a. Nominations/Confirmations process
  - b. DM Elective Read Submission
  - c. Response file receipts
  - d. Associated DM activities
  - e. Any other elements

In order to ensure early engagement with the relevant parties and assist in the facilitation and co-ordination of the external testing, xoserve requires a view of which Shippers would like to complete testing and their specific testing requirements.

Please respond to [xoserve.dmelective@xoserve.com](mailto:xoserve.dmelective@xoserve.com) registering your interest and any specific elements you would like to test by 31<sup>st</sup> August 2010.

**NOTE:** To ensure that Shippers and their operational staff are aware of the DM Elective External Shipper Testing, we have sent this email out to multiple distributions lists so apologies if you have received it more than once.

Regards,

Lewis Plummer
