Communication Ref : CB/999/JT
Subject : NTS Entry Commodity invoice file format (.ECO)

Colleague,

With reference to the Record Content table on page 1 of the (.ECO) invoice file format document.

A correction is required to the optional record name RT_R07_REMITTANCE_advice_item.

The latest version 5.1 states up to 3 occurrences, however since the implementation of pricing consultations GCM10 and GCM11/12 for the TO Over Recovery Entry Revenue mechanism, which resulted in the creation of additional charge types (TAC,TOC,TOR & TAR) in February 2009; the table wasn't updated to state up to 7 records.

This issue was identified by a User who was unable to load the file in question. It is assumed that no other Users have experienced difficulties, therefore xoserve proposes that this change is implemented to the UKLink Manual as soon as possible. It is proposed that this is discussed at the August UKLink Committee, and approval sought to implement without a formal notice period. User representations are invited on this matter to be received by the UKLink Manual box account by 7th August. User comments are specifically invited on implementation of this documentation change without a notice period, and – if approved – an implementation immediately after the UKLink Committee Meeting in August.

Regards,

Jo-Anne Tedd
