## **CB/888/DA : DN Interruption Reform**

Dear colleague

As discussed at the January UKLink Committee we have updated the consolidated SPA Rejection Code List published on the UKLink Extranet Site.

The latest live version is now v17 which is effective immediately.

The changes reflect the two new rejection codes – NOM000036 and NOM000037 which were introduced as part of the DN Interruption Reform Change (UK Link 13829).

These changes were subject to representation so this communication is for information only.

Should you have any comments please provide these to uklink mailbox at [uklink@xoserve.com](mailto:uklink@xoserve.com)

Regards,

David Addison
