Subject: CB/921/JS - COR1353 'DNO Failure to Supply Gas Process' *.FSI (Supporting Information)

Dear Colleague,

Change Order Request COR1353 'DNO Failure to Supply Gas Process' was discussed at today's UK Link Committee. The original agreement for COR1353.1 was to issue the new Failure to Supply Gas Supporting Information file (.FSI) via email, as an Excel attachment, to the User contacts that currently receive the current Failure to Supply Gas Supporting Information file (.FSG). Not all UK Link Committee members were present and therefore agreement was reached that the proposed minor amendments to the *.FSI file format should be deferred for 5 days until other UK Link committee members had opportunity to comment.

Representations are now sought on the following file changes:

K29, K30, K31 & K32 records

Length of BUILDING_ NUMBER field to be changed from 4 to 20. This is to ensure consistency with the input file received from Networks.

K30 & K32

Optionality of INV_ NUMBER field to be changed from Mandatory to Optional. This is due to xoserve not holding the invoice number for paid direct sites as these are paid directly by the Networks to the End Users.

COR1353.2

Users representations are also sought regarding the implementation date for 1353.2. xoserve are seeking approval for implementation of the revised formats, notified within this communication, as part of the approved implementation on 6th November 2009. Users are also asked to comment on this point within their representation response.

User Representations are invited by 20th August 2009 using the standard UK Link representation form. Please find attached a copy of the proposed changes (revised and tracked) versions of the *.FSI File Format. If no negative comments are received the change will be implemented as soon as possible.

Should you have any questions concerning the detail of the change please contact Yvonne McHugh (0121 623 2428).

Regards

JulieSmart
