Subject: CB/929/SK - Gemini Enhanced System Security Project: Implementation Outage

Dear Colleague

Further to recent communications on the above project and progress to implement changes on Saturday 17th October.

Unfortunately due to a production issue experienced within one of the affected systems earlier this week we are not in a position to proceed with the scheduled implementation on Saturday 17th October, consequently there will **not** be an outage to the Gemini system.

Project Implementation activities are now focusing on the contingency date of **24th October** with the same outage period of **14:00 to 18:00 hours.**

I will continue to keep you informed of progress. Please do not hesitate to contact me if you have any questions or require further clarification.

Regards
