Subject: CB/936/DA - Requirements arising from the ConQuest External User Group

Colleague,

Further to the discussion at yesterday's UKLink Committee regarding the xoserve Strategic Project that will result in a replacement of the ConQuest system, please find attached the initially requested requirements collated within the ConQuest External User Group, and also from subsequent requirements provided to us by the 30th October deadline.

The primary objective of the project is to ensure that xoserve has a robust query resolution system. We have solicited input from Users to determine whether other requirements exist that can be accommodated within the project timelines. The attached requirements list are still being analysed by the project team, and it is intended that we will be able to provide initial assessment of scope at the ConQuest External User Group in December. Users are asked to consider the impacts upon their systems, as this will assist xoserve with considering solution options. Please note, a number of the requirements are likely to affect User Interfaces, and also the ConQuest file formats in terms of amended optionality and data structure, so comments are particularly sought on these elements.

This is not intended to constitute a formal representation period, but your comments would be appreciated. I would be grateful if you could provide any comments by 27th November to the UKLink Manual box – uklink@xoserve.com

Should you wish to discuss this matter please do not hesitate to contact me.

Regards,

David Addison
