Date: 1 May 2014
Our reference: 1st Draft 2014 AUGS for 2015/16

Dear Colleague

The 1st draft 2014 AUGS for 2015/16 is now published for consultation which will end at 5pm on 12th June 2014 (42 days as per AUGS Guidelines).

The AUGS contains details of the analyses carried out in 2014. These assessed the impact on the Unidentified Gas methodology of a number of approved modifications that came into effect by 1st April 2014. The analyses have been carried out based on existing datasets, supplemented by more recent snapshot data with additional data fields where required. This supplementary data will be posted on UK-link in due course.

Although the consumption based approach to calculate total Unidentified Gas is unchanged, the description of the methodology has been updated to improve clarity.

The AUGS will attend and present a summary of the 1st Draft 2014 AUGS for 2015/16 at an industry meeting on Tuesday May 20th. As per previous years, this is an opportunity for an initial Q&A session to clarify particular points set out in the AUGS before submitting consultation responses.

To enable us to investigate issues raised during consultation, particularly those that may require additional data or analysis to resolve, we request that any responses are submitted as early as possible. Queries arising can be sent to the AUGS mailbox, AUGS.software@dnvgl.com.

Sincerely
for DNV GL

Tony Perchard
Consultant
