EH/809/DA - Revised Representation Pack 15/02/08

Dear Colleague,

Following the issue of communication EH/809/DA that provided the UKLink Committee Representation Pack on Friday 15th February, it has been highlighted that the references for each communication were transposed. The request for representations should have referred to "EH/809/AS – 2 - UK Link Reference: 13950 - Gemini 2008 Release (Summer)", not EH/809/AE as referenced within the body of the original message.

The changes detailed in "EH/809/AE – 3 - UK Link Reference 13829 - DN Interruption Reform" – were approved at the February 2008 UKLink Committee Meeting, and this communication was issued to provide a consolidated view of the file formats associated with this change. Representations are not specifically sought on this matter.

<<DN Interruption Approved File Formats>>

Please note, in addition to the changes notified in communication EH/808/AE on 12/02/08, the version of the *.SBF format has been changed to include the actual record reference of Q03 in the description of the BID_NUMBER in the Q03_SHIPPER_BID_FILE record rather than the default record reference - D05 - that was included within the original field description. This change does not amend the file structure, and has been corrected as a minor administrative change. The file format has been incremented to version 5 as a result of this change.

<<SBF File Format AV5.pdf>>

The charge types notified in "EH/809/DA – 1 - Changes to the Ad Hoc Invoicing Process for User Pays (Type I) Code Services" – have been provided to the UKLink Committee distribution lists as a courtesy notification, as discussed at the December 2007 meeting. Representations are not specifically sought on this matter.

<<EH/809/DA - 1. Changes to the Ad Hoc Invoicing Process for User Pays (Type I) Code Services>>

Should you have questions with regards to the content of the above communications, please do not hesitate to contact me.

Users representations are invited by 29th February 2008 on "EH/809/AS - 2. UK Link Reference: 13950 - Gemini 2008 Release (Summer)". This retains the 10 day representation period from the change pack issue on Friday 15th February. Should you have any concerns regarding this, given the previous communication, please contact me.
