**Subject: EH725DA – Amendment to the Window for Acceptance of Meter Reads by Transporters
– UNC Modification 0124**

Dear Colleagues,

Following approval of UNC Modification 0124 (Amendment to the Window for Acceptance of Meter Reads by Transporters), it is our intention to implement the read window parameter change (from 10 days to 15 days) as a class 1 UKLink Modification on Monday 16th April 2007.

There are no changes anticipated to the UKLink file formats.

Following implementation of this change, the MRE00489 rejection code (non-opening reading received outside the read receipt window) will be applied after an additional 5 business days.

This communication has been issued prior to the UKLink Committee Meeting as it is our intention to seek confirmation of the implementation date, or consider shipper views regarding the classification of this UKLink Modification, at the Committee Meeting on Thursday 12th April 2007.

If you are unable to attend, or you wish to provide your views prior to this meeting, please provide comments to uklink@xoserve.com by 5pm on Wednesday 11th April 2007.

Regards

David Addison
