npower	David Mayne	27/04/07	Accept	Yes	We support this change	
Scottish & Southern Energy	Cher Harris	27/04/07	Reject	Yes	<p>We require further clarification of the proposed changes before we can accept them. Specifically, we seek responses to the following issues:</p> <p>It looks as though the proposal is saying that they will add a new I22 record, as the current CCA charge item is on the I21 record. There isn't an I22 record on the invoice backing at the moment so it would be useful to clarify that this is the case. If it is, the addition of this new record should be classed as a file format structure change.</p> <p>This change in file structure will require changes to our validation program to accommodate the new record, and calculation for the new charge item. We therefore require 6 months notice from approval to implement the necessary changes. How soon will the new file format be available?</p>	<p>Thank you for your comments. It is confirmed that there are no file format changes as the I22 record is an existing optional record within the LDZ Capacity Invoice Supporting Information (*.CZS) File.</p>
