Subject: EH/760/DJ - UKL 13284 - Issue of Supporting Invoice documentation via IX,

Dear Colleague

Following discussions held at the UK-Link Committee meeting held on the 9th August 2007 in which xoserve advised of it's proposal to correct an error identified within the A00 Header file that is issued to accompany both the .BCD Backup Detail and .OOA Adjustment Detail files. Please find attached a copy of corrected file formats for your attention.

The proposed correction is to include the 'ORGANISATION _ID' and 'CREATION_DATE' fields which was previously omitted from the original Header file format issued.

We recommend that this is a Class 1 change and invite your comments on the classification of the change in particular. Please send your comment to the e-mail box account: .Box.UKLINK.Manual by the 24th August 2007.
