Subject: EH/840/DD - UKL13950 Update

Colleagues

Further to my email **EH/837/DD - UKL13950 Changes to files that have previously been for representation**, dated 13/06/08, I can confirm that no further comments have been received.

Version 4 of the ECO file format will therefore go live on 27th February 2009, along with Version 2 of the ECO Hierarchy diagram.

In addition an invitation to receive test files for the new file formats was offered, during a general communication sent on 24th June. xoserve have not received any response and will therefore not plan for this activity.

Regards

Donna
