EH/850/AE - DN Interruption Summary Files

Dear Colleague,

The DN Interruption Summary Reports by Location and LDZ are due for issue today detailing the results from the first DN Interruption Auction.

The Summary Report By Location (SRL file) relies on there being awarded contracts for at least 3 Users in a location to ensure a level of autonomy for the successful sites. Due to there being limited number of contracts that were awarded, this criteria was not met and therefore the SRL file cannot be issued.

Distribution Networks have already published a summary report through the Joint Office Of Gas Transporters via an e-mail that provides an added level of detail when compared to the system summary report (SRZ file). As a consequence DN's have requested that xoserve defers delivery of the SRZ file to avoid confusion between the two report summaries. The link Joint Office web site where all of the summaries can be downloaded is listed below, however xoserve will be pleased to make the SRZ file available to Users upon request to Andrew.Earnshaw@xoserve.com. If required please make all requests by 8th August 2008 ensuring that your organisation ID is provided.
