Subject: EH/884/AS - NTS Entry Capacity Invoice File Format Update for the Enduring Transfer and Trades Project Update

Dear Colleagues

Further to my emails dated the 17/10/08 and the 20/10/08 requesting representation for UKL14001, I can confirm that no comments have been received.

The items sent for representation were:

- The proposed changes to the NTS Entry Capacity Invoice File Format, as a consequence of the functional changes being made to the Gemini application.
- The Shipper Facing Screens which have been amended or created as a consequence of the functional changes being made to the Gemini application.
- The option to participate in Shipper Trials.

As we have had no representations in regards to the Shipper Trials, we can confirm that this will not take place as part of the Enduring Transfer & Trades project.

Regards,

Andy Simpson
