Dear Colleague,

EH/904/SP - XOS1220 & XOS1222 - Application of Backstop date on all AQ processes

This is to confirm that xoserve have successfully implemented an amendment to four Appeal/Amendment rejection codes (STD00149, STD00150, STD00151 and STD00152) previously this captured the backstop date of 01/03/1996.

The rejection text in the SPA Standard List has now been amended to reflect this revised date. For example, the rejection STD00149 text has been updated to 'The Start Reading Date must be after ~~1.3.1996~~ 30/09/2002'.

As no Shipper representation was received on this change by the target date of the Friday 29th May, this amendment has been implemented and rejections received after 1st June will reflect the correct validation.

Should you need any additional information of have any concerns relating to this change, please contact me direct via email at aqq.spa@xoserve.com

Regards

Susan Prosser
