Dear Colleague

EH/915/DA - Administrative Changes to Published File Formats

Two discrepancies have been identified with files in the UK Link Documents Extranet Site. The first is the Withdrawal & Objection Response File (WOR), which contains a record T89 that was added to the file for representation in 2004 but was withdrawn and has never been used. The second is an administrative error within the UPN file that makes reference to the P17 record instead of the correct P18 record.

The files will be updated as a Class 1 Administrative change and representatives are requested to uklink@xoserve.com by 24th July 2009. If no contrary representations are received, the files will be updated as soon as possible.

Regards
David Addison
