Distribution List Not Shown
Subject: EH/920/JS - COR1353 'DNO Failure to Supply Gas Process' *.FSI
(Supporting Information)

Dear Colleague,

EH/920/JS - COR1353 'DNO Failure to Supply Gas Process' *.FSI (Supporting Information)

Change Order COR1353 covers the payment of end users connected to an independent Gas Transporters' (iGT) Network and end users connected to Distribution Network Operator (DNO) where the discontinuance of conveyance of gas has occurred as a consequence of an event on a DNO Network. The Change was approved at the 11 June UK Link Committee for partial implementation on 15 August 2009 (**1353.1**) with release of the *.FSI file from 06 November 2009 (**1353.2**) UK Link Release Date.

Minor amendments have since been identified to four records which form part of the *.FSI supporting Information File to Shippers. The changes will be discussed at the UK Link Committee on Thursday 13th August 2009. xoserve are requesting that UKL Committee agree the changes in readiness for the original 1353.2 implementation date of 06 November 2009. Approval will be sought at the August meeting tomorrow which will be via Teleconference, so Users may wish to dial in.

The modifications are summarised as follows:
K29, K30, K31 & K32 records

- Length of BUILDING_ NUMBER field to be changed from 4 to 20. This is to ensure consistency with the input file received from Networks.

K30 & K32

- Optionality of INV_ NUMBER field to be changed from Mandatory to Optional. This is due to xoserve not holding the invoice number for paid direct sites as these are paid directly by the Networks to the End Users.

In the event that the changes can not be made until after 06/11/09, the file will continue to be issued manually via the Adhoc process until such time as the notification period required by UKL Committee has elapsed. It is intended that the changes are made universally.

Should you have any questions concerning the detail of the change please contact Julie Smart (0121 623 2762) or Dave Turpin (0121 623 2761).

Attached is a copy of the revised and track changed versions of FSI File Format.
