**Subject: EH/894/DA - Potential Changes to OUG and CMP Issue**

Dear Colleague,

As discussed at the UKLink Committee meeting today, xoserve is undertaking a replacement programme for its current reporting system, the Operation Data Store (ODS). xoserve is also seeking to automate the delivery of the reports where possible.

Currently some of the data provided in support of invoices are sourced from the ODS, and emailed to Users. xoserve are currently undertaking the design of the report outputs that are scheduled for release within the first delivery of the replacement programme currently planned in September. The supporting file format documents for the 'Compression Invoice Supporting Information File' (.CMP) and the 'Own Use Gas Invoice Supporting Information File' (.OUG) may be included within this release.

xoserve would like to solicit early views from Users whether issue of these formats would be acceptable via I'X. It is expected that the record structure will not change functionally – but this is to be confirmed through detailed analysis - other than requisite changes to accommodate I'X standards.

Shipper comments are invited upon this change, particularly noting the potential implementation date in September 2009. Please provide comments to the [uklink@xoserve.com](mailto:uklink@xoserve.com) account by Tuesday 28<sup>th</sup> April. xoserve shall provide more detail in the next UKLink Change Pack – which will be issued on 15<sup>th</sup> May 2009 – when formal representations will be sought.

Should you have any questions regarding this communication, please do not hesitate to contact me.

Regards

David Addison
