Subject: CB/895/DA - LDZ_CHARGE field name change

Dear Colleague,

The following note is for information purposes only.

Following the UK Link Committee meeting in October 2008 and communication EH/873/DA - UKL 13885.2 -IFA Database Amendment. xoserve obtained approval for a minor amendment to the IFA File format. The change required an amendment to the description of the LDZ_CHARGE field name on RT_K23_IFA_INVOICE_DETAIL record to read as:

IFA Allowance x LDZ Rate x number of days in the contract / 100. The first character is prefixed with a negative '-' if it a payment to the User.

The updated IFA File Format (Version 4) has now been published on the UKLink Documentation extranet site.

Should you have any comments related to this change please provide to uklink@xoserve.com

Thanks and regards

David Addison
